

Please "DO NOT" do anything to change or diminish in anyway Indiana's Telephone Privacy Laws. I was so relieved when this law went into effect. I work 4, 10 hour days and I have to arise every morning at 3:30 a.m. I don't get home until 6:30 p.m. and that doesn't give me much time once I get home to relax.

Especially when I try to fix supper, clean up, fix clothing and lunches for the next day, etc. I don't have time for interruptions from telemarketers. Before this law was inacted, I would receive at least one call each evening and I have received as many as five in one evening. Also, I have an answering machine because I have elderly parents and I want them to be able to leave messages if they need me for anything. However, when these telemarketers call using their computer dialing

and I am not at home to answer, it messes up my answering machine.

I end up with a continuous tape recording of the operator asking them to hang up and redial. This present system isn't broken, it actually works fantastic so please leave it alone.
